1688.

Apollo Anglicanus,

THE

ENGLISH APOLLO:

Assisting

All Persons in the right Understanding of this Years Revolution, as also of things past, present, and to come.

With necessary Tables plain and useful.

A twofold Kalendar, *viz. Julian* or *English*, *Gregorian* or *Forein* Computations, more plain and full than any other, with the Rising and Setting of the Sun, the nightly Rising and Setting of the Moon, and also her Southing, Exactly calculated for every day. Of general use for most men.

Being Bissextile, *or* LEAP-YEAR.

To which is added the Moons application to the fixed Stars: With the Calculation of the Eclipses: also Rules and Tables for the measuring of Timber: with many other things both pleasant, useful and necessary.

Calculated according to Art, and fitted to the Meridian of *Leicester*, whose Latitude is 52 Degrees, 41 Minutes, Exactly fitting all the middle Counties of *England*, and without sensible Error the whole Kingdom.

By RICHARD SAUNDERS,
Student in the Physical-Cœlestial Sciences.

LONDON: Printed by M. CLARK for the Company of STATIONERS, 1688.

The *Julian* or old Account used in *Engl.*	1688.	The *Gregorian* or New Stile used beyond Sea.

The Union of the two Kingdoms.							
James	1	1566	1602, Ma. 24	22	0	1639, March 27	Westmin
Charles	1	1600	1625, Ma. 27	23	11	1339, Janu. 30	Windsor
Charles	2	1630	1648, Jan. 30	36	0	1683, Februar. 6	Westmin.
James	2	1633	1684, Feb. 6	Whom God grant long to live.			

When *David* reign'd, as in Scriptures do us tell.
Proud *Absalom*, and great *Achitophel*
Did live and plot; and also in those days
Were other Plottings, such as was *Shebah's*
Conspiracy: (Methinks in this our age,
Men much like these have passed o'er the Stage.)
As these did speed in what they did, so I
Let all that strive, like them to live, so dye.

A Table shewing the hour and minute of the Moons coming to the South every day the first six Months of this Year, 1688.

To find the time of High-water in most Coasts of England.

FIrst seek the Moons Southing on the foregoing Table for your day, for then you may conclude it High-water at *Southampton*, *Quinborough*, and *Portsmouth*, for there the South and North Moons make a High-water: But when you desire the time of full Sea in any of the following Coasts in the ensuing Table, find the name of the place, and see how many Hours and Minutes be annexed thereunto in the Column under H. M. which added to the time of the Moons coming to South, gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

	H.	M.
Rochester, Malden, Aberdeen,	0	45
Gravesend, Romney, Ramkins,	1	30
London, Tinmouth, Hartlepool,	3	0
Frith, Leith, Dunbar, Narbon,	4	30
Newcastle, Falmouth, Humber,	5	15
Lyn, Antwerp, Plymouth Hull,	6	0
Bristol, Lanton, Foulnesse,	6	45
Milford, Bridgwater, North coast,	7	30
Portland, Peterport, Harfleur,	8	51
Dover, Yarmouth, Harwich, Dublin,	10	30
Calice, Rye, Winchelsey, Calais,	11	15

Example.

The 14. of *Apr.* this Year it is required to know the time of High-water at *London*: By the Tab. of the Moons Southing, over against the 14. of *April*, I find the Moon South at 7 Hours 2 Minutes in the Morning: Then in the preceding Tide-Table against *London*, I find 3 Hours 0 Minutes, which added to 7 Hours 2 Minutes, makes 10 Hours 2 Minutes, being the time of High-water at *London* the 14. day of *April* in the Morning. So of any other.

NOTE, That the Tide floweth one point of the Compass more at the New and Full of the Moon, than at the First and Last Quarters: as also the Latitude of the Moon and Wind, may alter it an hour sooner or later.

Directions for the subsequent Diary or Almanack.

IN the first Column to the left hand, on the left-hand Page, you have the Numerical Figures of the days of the Month.

In the second Column you have the week days, and the Dominical Letter.

In the third Column you have the Saints days, and the places of the Planets once a Month; as also the Moons application to the fixed Stars, by which the Asterisms and Constellations may be easily known to an ingenious eye and understanding.

In the fourth Column the Moons place in the Zodiack every day at noon.

In the fifth Column the Rising and Setting of the Moon, with respect to her Latitude.

In the sixth Column the Mutual Aspects of the Planets, with the general state of the Weather.

In the first Column on the Right hand Page you have the English Account.

In the second Column you have the Roman Account.

In the third Column the Roman Week days.

In the fourth Column the perfect Roman Kalendar, and Saints days.

In the fifth Column you have Poetical Stories of the fixed Stars and Constellations, shewing the reason why such various Figures are fancied to be placed in Heaven.

The sixth, seventh, and eight Columns, the utmost to the Right hand, shew you the daily Rising and Setting of the Sun.

ADVERTISEMENT.

THose highly approved, and only true Spirits of *Scurvy-Grass*, both plain and golden, famous for the Cure of the *Scurvy*, *Dropsie*, and several other general Distempers, are exactly and faithfully prepared by *Martha Hooker*, Executrix of Mr. *Robert Bateman*, at his House in *Pauls-Chain*, near *Doctors Commons*, *London*; Price 1*s.* each Bottle, the Bottles being sealed with his Coat of Arms, the *Half-Moon* and *Estoile*, with printed Directions to each Bottle, which is to prevent your being cheated with Counterfeits which are lately started up, which notwithstanding all the late pretences, our own experience tells us that these are the *True Spirits*.

Moons Aspects.

High Winds at the ☌ ☉ ♃ beginning with some drisling Rain: But after the ✱ ♄ ☿ fifth day good seasonable weather is expected; and in all likelyhood very hot and sultry weather for some days.

□ ♄ ☿
☍ ♃ ☿

Moons Settings.

☽ within.

But after the New Moon some pleasant ✱ ♄ ♂ cooling gales of Wind, and generally good Harvest weather; and unless the 26th day produce some showers no great alterations to the end of the Month.

Saturn *sets about* 10 *at Night.*
Jupiter *at the beginning is South at midnight, at the end he is South at* 10 *at night.*
Mars *sets a little after the Sun.* Venus *riseth a little before the Sun.* Mercury *follows the Sun and* Mars, *and doth set after them.*

OCTOBER, 1688.

Saturn *towards the beginning is Combust.*
Jupiter at the beginning is about 10, *at the end* [illegible]
rises between 8 *and* 9 *at night.*
Mars is quite from under the Sun beams, and rises first in.
Venus and Mercury are still under the Sun-beams

A Table shewing how many Years purchase a Lease or Annuity to endure for any number of Years under 33: is worth presently, at Interest upon Interest, at Six in the Hundred; and shewing plainly how to discount any Lease in Being, and the value of the Reversion after any number of Years.

Years of a Lease.	Years.	Worth.	Tenth parts.
1	0	11	0
2	1	5	9
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	7
9	6	9	9
10	7	4	3
11	7	11	7
12	8	4	6
13	8	10	3
14	9	3	6
15	9	8	5
16	10	1	2

The Use and Explanation of the TABLE.

The first Column towards the left Hand sheweth the Years of a Lease, or Annuity, & right against each Year, is the Years, Months, & Tenth Parts of a Months Purchase, that such a Lease or Annuity is worth.

EXAMPLE.

Suppose a Lease or Annuity to continue 12 Years, and you would know how many Years purchase it is worth in present Money, look in the Table for Twelve Years of a Lease to the left Hand, & against the same you shall find, 8, 4, 6. which sheweth that such a Lease is worth eight Years four Months, & six Tenth Parts of a Months Purchase.

Years of a Lease	Years	Months.	Tenth parts.
17	10	5	8
18	10	9	9
19	11	1	3
20	11	5	7
21	11	9	2
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	4	9
29	13	7	1
30	13	9	2
31	13	11	1
32	14	1	0

AGAIN:

If you are to take or buy the Reversion of any Lease or Annuity, work thus; Suppose the Lease to be Thirty Years in all, you find in the Second Table and Right Hand against thirty, 13 Years, 9 Months, and 2 Tenth Parts of a Months Purchase; this it were worth were it in present Possession. But suppose there be a Lease of five Years (more or less) before you Commence, look in the Table against the five Years, and there you find four Years, two Months, five Tenth Parts of a Months Purchase; take this out of the Sum against thirty, which is, 13, 9, 2. The Remainder is, 9, 6, 7. which is 9 Years, 6 Months, and 7 Tenth Parts of a Month: And so much is the Reversion after five Years worth, the Remainder of thirty Years.

This is Useful, and very Easie.
